

I oppose the transfer of license(s) held by Rainbow DBS LLC to EchoStar Satellite LLC. I am a subscriber of VOOM, and I think VOOM has done a very good job of creating an emerging market for high definition television.

Without the continued existence and pressure placed on the market by VOOM, I feel there would be very little drive for innovation, and a strong potential for monopolization of the high definition premium programming space. VOOM's contributions to its customers and the high definition community as a whole have been wonderful.
